Ejercicio 9

$$B_{fc} = \left[\frac{B - C}{R} \right] = \left[\frac{4096 - 9}{235} \right] = 17 \frac{\text{resistros}}{\text{bloque}}$$

$$Bf_{x} = \begin{bmatrix} B - C \\ R + M \end{bmatrix} = \begin{bmatrix} 4096 - 9 \\ (235 + 4) + 1 \end{bmatrix} = \begin{bmatrix} 4096 - 9 \\ 240 \end{bmatrix} = \begin{bmatrix} 4096 - 9$$
